- (b) The student drops the marble from different heights and measures the diameter of each crater that is formed.

The table shows the student's results.

<i>height (m)</i>	<i>diameter (m)</i>
0.05	0.030
0.10	0.044
0.15	0.053
0.35	0.074
0.40	0.076
0.45	0.076

- (i) Using the graph paper below, draw a graph of these results.

11. (b) (continued)

(ii) Use your graph to predict the diameter of the crater that is formed when the marble is dropped from a height of 0.25 m. 1

(iii) Suggest two improvements that the student could make to this investigation. 2

(c) (i) Suggest another variable, which could be investigated, that may affect the diameter of a crater. 1

(ii) Describe experimental work that could be carried out to investigate how this variable affects the diameter of a crater. 2
